## Relationship/Compatibility

### Two Kinds of Relationships Report:

We offer two different approaches - an insightful soul-based approach for the individual person and a comparative "relationship" report interpreting the astrological correlations between two specific people.

#### (1) Kindred Spirits:

##### The Kindred Spirits Report

Focuses on the individual, encouraging them to reflect on what their Soul needs in an intimate relationship. It creates and explains astrological images as depicted in the birth chart. Thus it can assist a person to reconsider their relationships in a different light

**\$45.00**

#### (2) Astrological Compatibility (Synastry) Report

This report is based on the astrology technique of Synastry which compares the horoscopes of two people and interprets potential relations between them.

It reveals areas of harmony and compatibility as well as areas of potential tension and conflict. We suggest that the recipient of this and other reports could benefit greatly from a supplementary "live" consultation because human relationships are complex and contradictions can show in the interpretation.

## Other Reports

### Health and Wellbeing Report:

Medical Astrology is complex. Many factors need to be taken into account when considering one's overall health. This report includes an assessment of the birth chart specifically focussing on health-related matters. It includes a range of nutritional advice, stress management tips and therapy options. It is not a substitute for a full assessment with a medical practitioner. It aims to point out the astrological indicators that can manifest as health problems or imbalances and to suggest possible causes and/or treatments that may be of value.

**\$40.00**

### Vocation Report:

A vocation is the inner calling to one's authentic role in the world. The astrological horoscope contains suggestions to help you consider a

fulfilling vocation. This report will introduce you to the archetypal forces that underpin your personal search.
